PROJECTS

Jamming Codecademy React App | *HTML5, CSS, Javascript, React.js*

- Developed a React web app for Codecademy's Front-End Engineer Career Path that utilizes Spotify API allowing users to search the Spotify library, create a custom playlist, then save it to their Spotify account
- Added features not required for the project, such as: separate login page before entering the app, not allowing the same song to be added to the same playlist twice, and removing a song from the "results" list once added to the current playlist

Embark Performance Training | *HTML5, Javascript, Bootstrap, Sass, Figma* | *Project in Development*

- Designing and developing a multi-page website for a local small business
- Created wireframes through Figma and collaborated with the business owner on UX/UI design and branding
